Join AHA Team Training for Their Free Monthly Webinar Creating a Culture of Safety in Four *[not so easy]* Steps – Registration Open!

Creating a safety culture is a key to achieving high reliability in health care. Many areas in acute care settings are often resistant to change, and yet pose significant risk to patients.

Register for this month’s webinar to hear David L. Feldman, Chief Medical Officer and Senior Vice-President of Hospitals Insurance Company review the necessary ingredients for such a change using the Operating Room as a typical, and challenging, example. Key topics to be reviewed include creating a respectful environment and Just Culture as well as using TeamSTEPPS advanced techniques and concepts in human factors engineering. The audience will be asked to reflect on their own experiences with these key topics using audience polling.

**Wednesday
April 10, 2019**

12:00-1:00 PM CT
