

Staffing shortages? Vacations? Medical leaves? ***Worried you'll never catch up on your coding days?***

ICAHN's coding team is comprised of contracted ICAHN hospital members who are experienced and credentialed coders who will work after hours and/or on weekends to help your hospital reduce expensive backlogs quickly, save space in your facility, and avoid expensive travel costs.

We also recognize the important role that accurate medical coding plays and, for that reason, our team also offers coding audit services and HIM consulting.

**Find out how we can help
make your job easier!**
