

Rural Health Clinic Webinar

Tuesday, July 25th, 2023

10 am to 11:30 am

Linking Finance and Quality in RHC's

In an era of increased value-based reimbursement, successful small rural clinics and hospitals will integrate quality and financial functions to eliminate operational silos. When properly implemented, the variety of new public and private payer-sponsored chronic care programs have the potential to fund mission-based priorities to increase access to high-quality care and fuel service growth.

Home Visit Program for Pregnant Women and Children

The Illinois Department of Human Services Division of Early Childhood home visiting program supports pregnant people and parents with young children (ages 0-5 years) who live in communities that face greater risks and barriers to achieving positive maternal and child health outcomes.

Learn how your RHC can coordinate with this program to provide much-needed community support. Home visits improve maternal and newborn health, prevent child abuse and neglect, promote school readiness, and provide connection to community resources.
